

KIDSnav Watches

KIDSnav GPS watches have been designed to allow parents to find the location of their child at any time, even within close proximity. If your child is a flight risk and is likely to run away when overstimulated, or if they are at risk of easily wandering off, KIDSnav watches are able to provide you with their exact location immediately through the mobile app, as well as being able to track their movement history.

The main features include:

BUILT-IN TELEPHONE

The ability to receive as well as make calls to parents by pressing just one button

GPS TRACKING

Displaying GPS coordinates in real time on the parent device

BUILT-IN MICROPHONE

The ability to discreetly listen to everything that happens around the child.

HISTORY OF MOVEMENT

The ability to view the entire history of movements for the last 3 months

MONITORING ACTIVITY

Pedometer, with which you can track how much a child has walked

SLEEP MONITORING

A feature that helps you monitor the duration and quality of your baby's sleep

SECURITY ZONE

Notification of parents when a child leaves a specially established zone

SOS BUTTON

One imperceptible press of the button, leads to an immediate call to parents' phones

Watches available for ages 5+ and 8+

Prices starting from £76.95
