

Young Work

Young work is a free app aimed at young people between the ages of 16 and 25 years, providing services to aid in finding work, education pathways and access to mental health or financial support. They have partnered up with a variety of companies and professionals that offer work placements, volunteering opportunities, shadowing, paid work and advice in a wide variety of industries.

Young Work is a nation-wide app, and as such the opportunities are all over the United Kingdom and remotely.

The aim of Young Work is to allow all young people access into their dream career industry, regardless of background. Alongside their placements, paid work and volunteer opportunities they offer personal support and users have access to 1:1 support and advice with a professional in their industry, access to LGBTQ+ support groups, vital hotline, counselling, financial support and more. They take a holistic approach to their users, where young people can email them for any specific issue or experience and they will find what they are looking for.
